## ABTERY JOINS QAMCOM GROUP

### ABTERY JOINS QAMCOM GROUP FOR STRATEGIC PARTNERSHIP TO PREPARE FOR AN AUTONOMOUS ELECTRIC FUTURE

GOTHENBURG, SWEDEN – (06/05/2019) - Abttery AB ([abttery.com](http://abttery.com)), state of the art electric powertrain designer, joins Qamcom Group. Together, the two parties aim to develop strong long-term synergies and keep pushing state of the art technology in the electric powertrain development.

“With the technology portfolio that Qamcom Group brings to the table, we stand ready to truly push electric autonomous vehicles to the next step” said Martin De la Vega, CEO of Abttery. “We are like two halves of the same orange, put together. Everything in future transportation will be electric and autonomous.”

Abttery, based in Gothenburg, Sweden, has a dynamic and vibrant team focused on various facets of the growing electric vehicle market; including automotive, aviation, last mile mobility and marine industries. Situated in one of the world’s most sustainable forward-thinking communities in Europe, Abttery currently provides services to many leading manufacturers through confidentiality agreements.

“The investment made in Abttery and collaboration we have set in motion will reinforce our technology offering as a whole and widen our portfolio” said Johan Lassing, CEO of Qamcom Group. “Together with Abttery, we will grow within the field of electromobility in several industries and transport sectors. Abttery and Qamcom truly complement each other.”

Qamcom Group consists of different technology companies and has one overall purpose, to unify great technology for good. With a holistic view, technology as a tool and people in mind, Qamcom always strives towards progress and to create value and results for all stakeholders.

The joint collaboration between the two companies will allow a strong strategic positioning within the autonomous vehicle technology segment. Qamcom will contribute with expertise within advanced embedded systems, system safety and research within autonomous vehicle technology, while Abttery’s expert team will support within the field of electric drive systems and electromobility solutions.
